Land Use Services Department, Advance Planning Division

TO: NARESH VARMA, Division Chief

Department of Public Works, Environmental Management Division

File: El Mirage Road/Yard 11/W.O.#H13546

SUBJECT: YARD 11 - CEQA CATEGORICAL EXEMPTION FOR IMPROVEMENTS TO EL

MIRAGE ROAD, EL MIRAGE AREA, SAN BERNARDINO COUNTY

I have reviewed, for California Environmental Quality Act (CEQA) compliance, the San Bernardino County Department of Public Works' proposal to improve approximately 1,000 feet of El Mirage Road, in the unincorporated area of the County in the vicinity of El Mirage. The specific road segment to be improved is El Mirage Road, from Grey Mountain/Silver Rock Road east to Colorado Road. It is designated on the attached vicinity maps.

Improvements include re-profiling to eliminate the existing hump east of the intersection of Grey Mountain/Silver Rock Road, re-trenching a ditch and adding a small culvert from the road, and minor dirt road grading on Colorado Road. The equipment used will be: scrapers, loaders, dump trucks, water trucks, and paving machines. All work will be performed within the prescriptive rights right-of-way, approximately 30 feet north and 30 feet south of the centerline.

The estimated start date for this project is July 1, 2003, and it is estimated to take approximately three (3) weeks to complete.

The Department of Public Works' Ecologist has determined (April 17, 2003) that the road lies within the distributional range of the desert tortoise (*Gopherus agassizii*), a federally and state listed threatened species, and Mojave ground squirrel (*Spermophilus mojavensis*), a state listed threatened species. The land north and adjacent to the proposed work location is open desert. To the east, west, and south, there are residences. The desert habitat contains elements that are suitable for both the desert tortoise and the Mojave ground squirrel. It is probable that both species occupy this habitat. Therefore, the following shall be implemented: 1) impact avoidance procedures (attached), written materials that detail the proper procedures to deal with a tortoise on site, following the procedures/protocols of the U.S. Fish and Wildlife Service and the California Department of Fish and Game, 2) desert tortoise poster signs shall be provided to the construction crew by the Department of Public Works, Environmental Management Division, 3) the phone number of the Department's Ecologist shall be provided by the Department of Public Works, Environmental Management Division. This is a contact for instructions, in the event that tortoises are encountered, if there is no biological monitor on site. Impact avoidance procedures shall be explained in detail to the contractor and all involved parties prior to executing the contract. If the work occurs between now and August, a survey should be conducted prior to start of work to determine whether a biological monitor will be required on site during construction.

It is my opinion that the proposed work qualifies for a Categorical Class 1 Exemption under Section 15301 (c) of the CEQA Guidelines that allows maintenance, repair, or minor alteration of existing facilities with negligible expansion of the existing use.

EL MIRAGE ROAD IMPROVEMENT PROJECT IMPACT AVOIDANCE PROCEDURES

Education

All persons employed on this construction project will receive these educational instructions, regarding the desert tortoise, before performing on-site work. Because there are no permits issued, currently, for any person employed or contracted with The County of San Bernardino, when a tortoise crosses into the project site work must stop. There are severe penalties, of the Federal Endangered Species Act and the California Endangered Species Act, if this does not occur. Employees are hereby notified that they are <u>not</u> authorized to handle or otherwise move desert tortoises encountered on the project site.

Handling a Tortoise

2. No person is authorized to handle desert tortoise without explicit permission from the California Department of Fish and Game (CDFG) and the U.S. Fish and Wildlife Service (Service). However, subsequent interpretation by the Service, August 1999, allows non-qualified persons to carefully remove a tortoise from an <u>immediate life threatening</u> position (i.e., attempting to cross a highway with active traffic which could harm the tortoise or heading for the edge of an auger hole or excavation to a nearby position of some form of safety). In removal situations, protection should be used to avoid direct contact and infecting a tortoise with a pneumonia virus common in humans or becoming infected with something the tortoise may be carrying. The tortoise should be lifted using both hands, and holding the left and right side of the carapace (backside of the tortoise), keeping the tortoise level and reasonably close to the ground or placed in a clean pasteboard box and gently moved out of harm's way and immediately released. It is essential to avoid frightening the tortoise causing loss of body fluids.

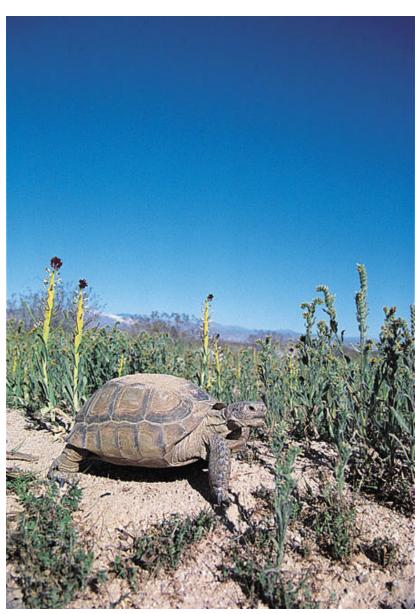

Pre-Construction/Construction Activities

- 3. Workers will inspect beneath each vehicle before moving it. If a desert tortoise is present, the worker will carefully move the vehicle only when necessary and when moving the vehicle would not injure the desert tortoise. Alternatively, the worker will wait for the desert tortoise to move from under the vehicle or contact the Department of Public Works' ecologist for instruction.
- 4. The area of disturbance shall be confined to the smallest practical area, considering topography, placement of facilities, public health and safety, and other limiting factors.
- 5. All food related trash items shall be placed in a container that precludes entry by wildlife, such as common ravens and coyotes. Food related trash shall be regularly removed from the construction site and disposed of at an approved refuse disposal site. Workers shall refrain from deliberate feeding of wildlife.
- 6. All grindings and asphaltic-concrete waste shall be hauled away off-site.
- 7. Vehicles and equipment shall stay on designated roads to avoid crushing vegetation and burrows.
- 8. No dogs are permitted on or near the project site.

Miscellaneous

- 9. If the County, its employees, contractors or agents kills or injures an individual of a listed species, or finds any such animal dead, injured, or entrapped, the County will immediately notify the Service and the CDFG. All reasonable efforts will be made to allow any entrapped animals to escape. Any dead or injured animal will be turned over to CDFG and a written report detailing the date, time, location and general circumstances under which it was found will be submitted to CDFG no later than three (3) business days following the incident.
- 10. The County will allow representatives from the Service and CDFG access to the project site to monitor compliance with the terms and conditions of the Federal Endangered Species Act and the California Endangered Species Act.
